Subject: Mirosoft Settlement

I have been asked to voice my opinion on the above subject.....

I guess I don't understand why our government (the DOJ) wants to stick their nose into a company that is not only one of the most successful in the history of business but also a company whose products and services have changed the world - FOR THE BETTER!

Why doesn't the DOJ go out and locate all the drug dealers, murderers and other criminals in the US and stay out of the way of innovative companies like Mircosoft!
